

Eukaryotes / Prokaryotes and Backpacks

If cells were a backpack, what would they look like?

Eukaryotes (Animal, Plant, Fungi, Protist)	Backpack	Prokaryote (Bacteria)
X	Lots of labeled folders	
X	Most inexpensive option to set up	
X	All necessary materials are there.	X
	Little time needed to organize	X
	Hard to find what you need quickly	X
X	Allows necessary functions to happen	X
	Has no folders or binders	X
	Least expensive option to set up	X
X	Won't work if you can't afford supplies	
X	Has a special place for everything	
	Papers are just stuffed in wherever	X
	All supplies are mixed up together	X
	Takes longer to find what you are looking for.	X
X	Works best if you have a lot going on.	
	Works best if you have more simple needs	X
X	Has to be bigger because of all of the organizers.	

Folders = Organelles (mitochondria, vacuole, etc)

Which kind of backpack are you?
