

Cell Mediated Immune Response

Macrophage

Helper T (CD4+)

Killer T (CD8)

Lymphokines

# Antigens Effective against	Whow many different organisms can this help destroy?				
Location of Effective Action	Where are these cells while they are doing their job?				
Kill / No Kill?	Do these cells kill or do they help others kill?				
Method of Kill	If they kill, what do they do to the antigen?				
Present in useful #s	Are they always around or is it only during an infection?				
Exact role	What is the specific job they do?				
Analogy	What did you name as the comparable "school invasion" person?
